# English plus SDGs Training Certificate Program

*"785 million people remain without even Basic Drinking Water Services"*

The English plus Sustainable Development Goals (SDGs) is an e-learning course which has been created in response to the growing demand to deliver online courses due to the difficulty of delivering face to face study abroad programs due to the on-going pandemic as well as for the growing need to deliver content related to sustainable goals by the United Nations aligned with the 2030 deadline.

This course is open to both domestic and international students looking to understand the growing importance of the broad agendas with the underlying objective of creating a sustainable future for all mankind.

This course has been optimized to be completed within 2 weeks. The total course duration is 20 hours. This will be broken down into 10-hour of English language, 10-hour of webinars and workshops on SDGs. This course has been designed as an interactive learning program to fully engage the students.

## Session 1: Introduction to Sustainable Cities & Communities (17 August – 28 August 2020)

- Good Health and Well-being
- Gender Equality
- Reduce Inequality
- Sustainable Cities and Communities

## Session 2: Introduction to Climate Action & Clean Energy (31 August – 11 September 2020)

- Affordable and Clean Energy
- Climate Action

These course will be fully delivered online through two platforms called Zoom and Miro. For Zoom, we would strongly recommend students download the app on their laptop or desktop computers, we do not recommend students to study via their mobile devices. Before the start of the course, we will send the students a link to register for the Miro application as well.

On completion of this program, students shall receive an e-certificate (conferred by both School of Public Policy and Language Institute Chiang Mai University)

Our Selection Process | We have limited spaces for each session, so we will be utilizing our online application. We will be looking at applicants English language self-assessed proficiency and the answer to the short question. We will look at spelling, grammar and sentence structure when assessing the applicant.
